

Material Handling Solutions

Canning Conveyor
Material Handling Solutions

A name to trust

Benefiting in over 50 years of experience in the design, manufacture, supply, installation and commissioning of bulk materials handling equipment and conveyors to a diverse range of industries world-wide, Canning Conveyor has built a world-wide reputation for the quality of its products and services.

Manufacturing facilities

Our engineering works at Worksop, incorporate design offices with the latest Auto CAD facilities and include a fully equipped and comprehensive machine and fabrication shop for manufacture, assembly and testing. This is backed up by the services of our skilled erection teams for installation and commissioning and a comprehensive after sales service for spares and maintenance, whilst maintaining our competitive prices.

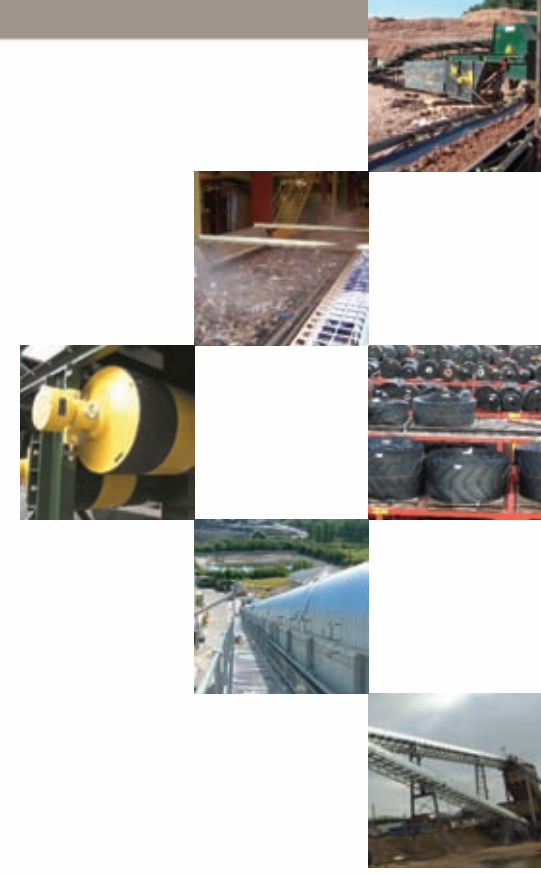

Our Product Portfolio

As a leading Bulk Materials Handling Solution Specialist we offer a fully comprehensive range of equipment including conveyor rollers and drums, drive units, complete conveyors and materials handling systems and associated equipment such as gears, crushers, screens, hoppers, feeders and weighers for efficient bulk materials handling.

We also supply completely new, second hand or fully reconditioned plant and equipment, or any combination of the above including design and fabrication to provide a bespoke solution.

A name to Trust

Canning Conveyor has now become a name which is well known by the industries we serve, throughout the world with an established high reputation for providing effective bulk material handling solutions.

Many years of experience

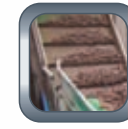

Canning Conveyor have many years of experience in supplying bulk handling equipment to a diverse range of industries including Mining and Quarrying, Power, Waste Management and Recycling, Agricultural, Food and Film & TV which has made Canning Conveyor a leading and well respected name throughout the world.

Focussing on providing the highest standards of equipment and services we are constantly developing new products for all the industries we serve. All the new products we have developed are well established in their specific market sector providing greater efficiencies at the most economical and cost effective price.

We offer a vast and wide range of products and services, holding huge stocks of conveyor belting, idlers, rollers and many ancillary components and design, manufacture and install many types of conveyors, hoppers, conveyor drums and associated plant and equipment.

Cannoflex

- A brand you can trust

Canning Conveyor is a name well known with an established high reputation for providing total conveyor confidence.

With the Cannoflex™ brand at the forefront of conveying excellence our standard conveyor belting has been developed for conveying heavy and sharp edged goods in bulk such as gravel, crushed stone, limestone, iron pellets, glass and coal, sand and fertilisers.

Cannoflex™ conveyor belts are quality products with an extremely high degree of reliability and are backed by over 60 years of experience in belt production. Extensive testing by the manufacturer ensures that Cannoflex™ belts are released only if they are first class from the viewpoint of chemical, technological, structural and manufacturing techniques.

- **Cannoflex Special Conveyor Belting**

- Chevron • Heat Resistant • Oil Resistant • Grip Top • Friction Back
- Cross Stabilised • Rip Stop • PVC • Elevator • Steelcord

- **Rubber Products**

Large stocks to cover virtually every application

- **Belt Reeling & Cutting Machines**

Available in two standard models

- **Vulcanising**

A complete on-site, or in-house vulcanising service

- **Vulcanising Products**

A comprehensive range

- **Tools**

A wide and comprehensive range of tools.

- **Conveyor Parts**

Drums • Fasteners • Scrapers • Tracking Devices

- **Conveyor Rollers**

Idlers, rollers and accessories in both steel and polymer

All our products we supply are manufactured using the latest technological methods. Top quality raw materials are used during the manufacturing process thus ensuring that all products produced are to the highest degree of precision and excellence.

Bulk Handling Solutions

Canning Conveyor offer a huge portfolio of bulk handling solutions developed from over 50 years of experience in the design, manufacture, supply and installation and commissioning of bulk handling equipment and conveyors to the industries we serve worldwide.

- **Troughed Belt Conveyors**
- **Flat Belt Conveyors**
- **Stockpile & Reclaim Conveyors**
- **Mobile Conveyors**
- **Modular Conveyors**
- **Air Supported Conveyors**
- **Chain Conveyors**
- **Bucket Elevators & Trippers**
- **Hoppers & Feeders**

We can additionally supply an extensive range of bulk handling and materials processing equipment including; crushers, screens, conveyors, feeders, available in either complete static or mobile plants.

Associated plant and equipment such as magnets, drums, bearings, motorised drums, motors and gearboxes is also available.

We also offer a bespoke design service to suit your application.

Canning SuperDrive™

Canning Conveyor is also the home of the famous SuperDrive™ which was launched with the new modular ground conveyor bays in 2005.

The SuperDrive™ Jib Head Unit is designed specifically to power ground conveyors operating in open pit & quarrying / extraction applications having the motor, gearbox and bearings totally enclosed and hermetically sealed inside a steel shell drum.

The SuperDrive™ has an impressive track record with high profile installations at numerous locations throughout the country and these are now reaping the benefits & rewards of the SuperDrive™ system.

Project Installation and Commissioning

Canning Conveyor has been involved with the design, manufacture, supply and the installation and commissioning of a vast array of projects for all our market sectors. Our core capability lies within our dedicated and highly experienced team of engineers who have the technical and project management expertise to successfully design, develop and deliver innovative solutions in response to any complex engineering problems. We can supply a complete range of services that includes consultancy and design, manufacture, installation and training all of which is 'professionally project managed', all of which is supported by one of the most comprehensive and reliable after sales service.

- Electrical design and installation
- Skilled labour to off-load equipment
- Full erection and commission
- Supply craneage and all the necessary tools and lifting equipment
- Supply of civils to your drawings
- A full site fitting and vulcanising service
- Full site maintenance and service packages to suit your budget

Our Mission is to be your engineering contractor of choice
