Horizontal Standard Sizes

Typical Layout

Inclines

For productions requiring variable gradients, the Hydraulic **TumbleAtor®** offers adjustable inclines and declines, enabling realistic uphill and downhill movement while maintaining smooth, controlled operation. The versatility of both the standard and hydraulic versions makes the Tumbleator® an ideal solution for film, television, live events and special effects applications where flexibility and reliability are essential.

Table of Inclines

Angle	Height (mm)
Flat	800mm (1260 with wheels)
15.5°	2397
16°	2448
17°	2550
18°	2651
19°	2751
20°	2850
21°	2949
22°	3047
23°	3144
24°	3240
25°	3336
26°	3440
27°	3523
